TEN-YEAR INDEX BY ISSUE
JOURNAL OF ENGINEERING FOR INDUSTRY
February 1981 through November 1990

February 1981, Vol. 103, No. 1
Technical Papers

Single Grit Simulation of the Abrasive Machining of Wood — pp. 1–12
D. A. Dornfeld

The Hammer QSD-Quick Stop Device for High Speed Machining and Rubbing — pp. 13–22
J. T. Black and C. R. James

Order Statistical Approach to Ground Surface Generation — pp. 22–32
M. Hasegawa

On the Mechanics of Chip Segmentation in Machining — pp. 33–51
R. Komanduri and R. H. Brown

The Potential for Industrial Energy Conservation in California — pp. 52–60
D. Dornfeld, P. Benenson, and R. Barnes

Torque and Stress Balanced Design of Helically Armored Cables — pp. 61–66
R. H. Knapp

System Approach to the Thermal Behavior and Deformation of Machine Tool Structures in Response to the Effect of Fixed Joints — pp. 67–72
M. H. Attia and L. Kops

The Role of Wheel-Work Deflection in Grinding Operations — pp. 73–78
K. V. Kumar and M. C. Shaw

On the Rowe-Spick Shear Angle Relations for Orthogonal Machining — pp. 79–80
P. V. Desai and S. Ramalingham

Circular Saw Vibration Control by Induction of Thermal Membrane Stresses — pp. 81–89
C. D. Mote, Jr., G. S. Schajer, and S. Holoyen

Polycarbonate Plastic Inserts for Spherical Acrylic Plastic Shells Under Hydrostatic Loading — pp. 90–98
J. D. Stachiw, R. B. Doland, and D. L. Clayton

Functional Assessment of the Grinding Wheel Surface Characteristics by Turbulence Amplifier — pp. 99–102
V. Radhakrishnan and J. F. Rahman

Adaptive Control Optimization of Grinding — pp. 103–108
G. Amitay, S. Malkin and Y. Koren

Upper Bound Analysis of Axisymmetric, Closed-Die Forgings — pp. 109–112
P. Dadras

Cyclic Behavior of Class U Wheel Steel — pp. 113–118
Y. J. Park and D. H. Stone

On-Line Hole Quality Evaluation for Drilling Composite Material Using Dynamic Data — pp. 119–125
T. Radhakrishnan and S. M. Wu

A Stochastic Tool-Life Model — pp. 126–130
S. Rossetto and A. Zompi

Reference-Pulse Circular Interpolators for CNC Systems — pp. 131–136
Y. Koren and O. Masory

May 1981, Vol. 103, No. 2
Technical Papers

The Development and Testing of the Space Shuttle Reaction Control System — pp. 137–143
P. R. Edwards, F. C. Svenson and F. O. Chandler

The Grinding of Workpieces Exhibiting High Adhesion Part 1: Mechanisms — pp. 144–155
S. Yossifon and C. Rubenstein

The Grinding of Workpieces Exhibiting High Adhesion Part 2: Forces — pp. 156–164
S. Yossifon and C. Rubenstein

Relationships Between Cutting Force Variations and Cutting Factors in Plain Milling Operations. Part 1: Plain Milling with a Single-Toothed Helical Cutter — pp. 165–173
S. Kato, T. Yamada, M. Hashimoto, and K. Yamaguchi

Relationships Between Cutting Force Variations and Cutting Factors in Plain Milling Operations. Part 2: Plain Milling with a Multi-Toothed Helical Cutter — pp. 174–182
S. Kato, T. Yamada, M. Hashimoto, and K. Yamaguchi

Tooling Design for ECM—A Finite Element Approach — pp. 183–191
V. K. Jain and P. C. Pandey

Stochastic and Fuzzy Decision Problems in Three Workpiece Lapping Process — pp. 192–196
Y. Sakai, Y. Tanaka, and M. Ido

A Deep Drawing Test for Determining the Punch Coefficient of Friction — pp. 197–202
S. Rajagopal

In-Process Measurement of Surface Roughness in Turning by Laser Beams — pp. 203–209
M. Shiraishi

A Method to Measure Contact Pressure Between Metallic Surfaces by Changes to Surface Roughness — pp. 210–217
S. Kato, K. Yamaguchi, and T. Kato

Optimum Process Design for a Single-Stage Multifunctional Production System — pp. 218–223
K. Hitomi and K. Ohashi

Optimization Analysis of Automated Assembly Systems — pp. 224–233
K. Hitomi and M. Yokohama

Dynamic Analysis of Milling Machine by Torque Signals — pp. 235–240
A. R. N. Shualb, E. Garcia-Gardea, and S. M. Wu

Ride Quality Analysis of Multi-Level Auto Rack Equipped Flat Cars — pp. 241–245
R. W. Carman and K. C. Kieres

Laboratory Investigation of Wheel Rail Contact Stresses for U.S. Freight Cars — pp. 246–254
S. Kumar and B. R. Rajkumar

Technical Brief

On One Analysis of Piercing by the Use of Flow Lines — pp. 233–234
H. Ishikawa and K. Hata

August 1981, Vol. 103, No. 3
Technical Papers

An Investigation of the Mechanics and Noise Associated with Coal Cutting — pp. 257–269
R. S. Becker, G. R. Anderson II, and J. Kovac

Numerical Techniques in Linear Duct Acoustics—Status Report — pp. 270–281
K. J. Baumeister

Continuous Miner Noise — pp. 282–292
J. Robertson, J. Kovac, and R. Bartholomae

Point Admittance of Cyclindrical Shells With and Without Ring Stiffening — pp. 293–302
E. C. Eichelberger

Locally and Nonlocally Reacting Flexible Porous Layers; A Comparison of Acoustical Properties — pp. 302–313
K. U. Ingard

Passive Acoustic Detection of Gas Leaks in Buried Pipes — pp. 314–318
A. Soom, H. R. Martin, and J. A. Lea

The Reduction of Capstan Effectiveness by Cable Bending Resistance — pp. 319–323
A. J. Shashaty

Behavior of Self-Excited Chatter Due to Multiple Regenerative Effect — pp. 324–329
Yoshitaka Kondo, Osamu Kawano, and Hisayoshi Sato

Quantitative Relationships for Acoustic Emission from Orthogonal Metal Cutting — pp. 330–340
E. Kannatey-Asibu, Jr. and D. A. Dornfeld

On Some Aspects of Surface Formation in ECM — pp. 341–348
O. V. Krishnaiah Chetty, R. V. G. K. Murthy, and V. Radhakrishnan

Technical Briefs

A Note on the Solution for Continuous Jet Penetration of Solids — pp. 349–351
W. P. Walters and B. R. Scott

Discussion on a Previously Published Paper by — pp. 352–354
G. Amitay, S. Malkin, and Y. Koren

November 1981, Vol. 103, No. 4
Technical Papers

Sound Transmission Through a Cylindrical Pipe Wall — pp. 355–360
A. C. Fagerlund and D. C. Chou

Analytical Modeling of Wave Interference Directional Micropohones — pp. 361–371
T. N. Carnes, D. D. Reynolds, and E. L. Hixson

On Circular Pipe Wall Vibratory Response Excited by Internal Acoustic Fields — pp. 372–377
H.-T. Loh and G. Reethof

TEN-YEAR INDEX BY ISSUE

Locally and Nonlocally Reacting Flexible Porous Layers; A Comparison of Acoustical Properties — pp. 302–313
K. U. Ingard

Passive Acoustic Detection of Gas Leaks in Buried Pipes — pp. 314–318
A. Soom, H. R. Martin, and J. A. Lea

The Reduction of Capstan Effectiveness by Cable Bending Resistance — pp. 319–323
A. J. Shashaty

Behavior of Self-Excited Chatter Due to Multiple Regenerative Effect — pp. 324–329
Yoshitaka Kondo, Osamu Kawano, and Hisayoshi Sato

Quantitative Relationships for Acoustic Emission from Orthogonal Metal Cutting — pp. 330–340
E. Kannatey-Asibu, Jr. and D. A. Dornfeld

On Some Aspects of Surface Formation in ECM — pp. 341–348
O. V. Krishnaiah Chetty, R. V. G. K. Murthy, and V. Radhakrishnan

Technical Briefs

A Note on the Solution for Continuous Jet Penetration of Solids — pp. 349–351
W. P. Walters and B. R. Scott

Discussion on a Previously Published Paper by — pp. 352–354
G. Amitay, S. Malkin, and Y. Koren

November 1981, Vol. 103, No. 4
Technical Papers

Sound Transmission Through a Cylindrical Pipe Wall — pp. 355–360
A. C. Fagerlund and D. C. Chou

Analytical Modeling of Wave Interference Directional Micropohones — pp. 361–371
T. N. Carnes, D. D. Reynolds, and E. L. Hixson

On Circular Pipe Wall Vibratory Response Excited by Internal Acoustic Fields — pp. 372–377
H.-T. Loh and G. Reethof

On the Acoustical Implications of Vortex Shedding from an Exhaust Pipe pp. 378–384
S. W. Rienstra
Variational Formulations for the Finite Element Analysis of Noise Radiation from High-Speed Machinery pp. 385–391
B. S. Thompson
Train Brake and Track Capacity Requirements for the 80's pp. 392–401
D. G. Blaine, M. F. Hengel, and J. H. Peterson
Drop-Size Distributions of Newtonian and Bingham Liquid Sprays Produced by Fan-Jet Pressure Nozzles With and Without the Preorifice pp. 402–408
W. S. Janna and J. E. A. John
Oxygen Facilities for Synthetic Fuel Projects pp. 409–417
W. J. Scharle and K. Wilson
Some Problems in Winding Geometry pp. 418–423
M. M. Schoppee
Determination of Balloon Surface in Textile Machines—A Finite Segment Approach pp. 424–430
G. G. Lisini, G. Nerli, and P. Rissone
The Role of Microcracks in Large Plastic Deformation pp. 431–436
L. H. S. Luong and R. H. Brown
A Date Dependent Systems Approach to Dynamics of Surface Generation in Turning pp. 437–445
S. M. Pandit and S. Revach
Table Sliding Taper Hobbing of Conical Gear Using Cylindrical Hob. Part 1: Theoretical Analysis of Table Sliding Taper Hobbing pp. 446–451
K. Mitome
Table Sliding Taper Hobbing of Conical Gear Using Cylindrical Hob. Part 2: Hobbing of Conical Involute Gear pp. 452–455
K. Mitome
A Finite Element Method for the Elastic Contact Problems pp. 456–461
T. D. Sachdeva, C. V. Ramakrishnan, and R. Natarajan
Optimization of Multipass Turning With Constraints pp. 462–468
D. D. Ermer and S. Kromodihardjo
Some Investigations into Machining With Driven Rotary Tools pp. 469–477
P. K. Venuvinod, W. S. Lau, and P. Narasimha Reddy
A Semi-Empirical Solution to Upset Forging pp. 478–483
P. Dadras

February 1982, Vol. 104, No. 1
Technical Papers

A Nondimensional Approach to the Membrane Stresses in Axisymmetrical Thin Shells pp. 1–7
T. C. Hsu and H. M. Shang
Acceleration Detection and Inertia Compensation of Pantograph Head Using a Constant Flow Hydraulic Servo pp. 8–16
T. Vinayagalingam
Plastic Flow Instability Under Compressive Loading During Shear Spinning Process pp. 17–22
M. Gur and J. Tirosh
Compensatory Control of Roundness Error in Cylindrical Chuck Grinding pp. 23–28
S. B. Rao and S. M. Wu
Drawing Force in Deep Drawing of Cylindrical Cup With Flat-Nosed Punch pp. 29–37
A. S. Korhonen
Analysis of Extrusion or Drawing of Polygonal Sections Through Straightly Converging Dies pp. 38–45
J. S. Gunasekera and S. Hoshino
Application of the Regeneraton Spectrum Method to Wheel Regenerative Chatter in Grinding pp. 46–54
K. Srinivasan
Rigid-Plastic Finite-Element Analysis of Plane Strain Rolling pp. 55–64
Guo-Ji Li and S. Kobayashi
Mathematical Modeling of Metal Extrusion Process pp. 65–70
S. Bhattacharyya, A. K. Majumdar, and S. K. Basu
Vibration of Wide Band Saw Blades pp. 71–78
A. G. Ulsoy and C. D. Note
Shape Changes in the Upsetting of Slender Cylinders pp. 79–83
J. A. Schey, T. R. Venner, and S. L. Takomana
Drill Point Geometry and Optimization pp. 84–90
S. Kaldor and E. Lenz
Tensile Fracture of Drawn Copper and Mild Steel pp. 91–96
E. G. Thomsen
Development of a 36-Axle Schnabel Rail Car pp. 97–103
A. P. Wivagg
Twist Moments and Deformations in Submarine Cable Installation pp. 104–107
A. J. Shashaty
On the Use of the Finite Element Method on Some Acoustical Problems pp. 108–112
L. Cederfeldt
Influence of Exit Impedance on Finite Difference Solutions of Transient Acoustic Mode Propagation in Ducts pp. 113–120
K. J. Baumeister

May 1982, Vol. 104, No. 2
Technical Papers

On the Catastrophic Shear Instability of High-Speed Machining on an AISI 4340 Steel pp. 121–131
R. Komanduri, T. Schroeder, J. Hazra, B. F. Turkovich, and D. G. Flom
Transfer Lines: A Determinstic Model for Buffer Capacity Selection pp. 132–138
E. Canuto, A. Villa, and S. Rossetto
Experiments on Adaptive Constrained Control of a CNC Lathe pp. 139–150
R. Bedini and P. C. Pinotti
Review of Noise Reduction Methods for Centrifugal Fans pp. 151–161
W. Neise
Acoustic Similarity Laws for Fans pp. 162–168
W. Neise and B. Barsikow
Measurement of Cotton Fiber Tenacity on the 1/8 Gage HVI Tapered Bundles pp. 169–174
R. A. Taylor
Effect of Crystallinity and Orientation on Oscillation During Drawing of Polyethylene Terephthalate pp. 175–181
H. M. Behery and B. K. Porcher
Development of a Cross-Braced Truck pp. 182–189
H. W. Mulcahy and R. J. Weeks
Effect of Weather, Age, and Cyclic Pressurizations on Structural Performance of Acrylic Plastic Spherical Shells Under External Pressure Loading pp. 190–201
J. D. Stachiw and R. B. Dolan
Pressure Resistant Bulkhead Penetrators for Fiber Optics in Deep Ocean Applications pp. 202–209
S. J. Cowen
Low Velocity Impact of a Viscoelastic Beam pp. 210–216
R. E. Llorens and E. J. McQuillen

August 1982; Vol. 104, No. 3
Technical Papers

A Data Dependent Systems Strategy of On-Line Tool Wear Sensing pp. 217–223
S. M. Pandit and S. Kashou
Plastic Bending of Work Hardening Materials pp. 224–230
P. Dadras and S. A. Majiessi
Ring Forming: An Upper Bound Approach. Part 1: Flow Pattern and Calculation of Power pp. 231–237
B. Avitzur ad C. J. Van Tyne
Ring Forming: An Upper Bound Approach. Part 2: Process Analysis and Characteristics pp. 238–247
B. Avitzur and C. J. Van Tyne
Ring Forming: An Upper Bound Approach. Part 3: Constrained Forging and Deep Drawing Applications pp. 248–252
B. Avitzur and C. J. Van Tyne
Development of a Friction Element for Metal Forming Analysis pp. 253–256
W. D. Webster and R. L. Davis
Variables Governing Patterns of Mechanical Residual Stress in a Machined Surface pp. 257–264
C. R. Liu and M. M. Barash
Characteristics, Riemann Invariants, and Plane Strain Plasticity pp. 265–271
S. Ramalingam, P. V. Desai, and K. Kim
The Prediction of Surface Accuracy in End Milling pp. 272–278
W. A. Kline, R. E. DeVor, and I. A. Shareef
Effects of Die Shoulder on the Prolateness and Deformation in the Bulge Test pp. 279–284
H. M. Shang and V. P. W. Shim
Predicting the Shear Plane Angle in Machining from Workmaterial Strain-Hardening Characteristics pp. 285–292
P. K. Wright
Criterion for the Prevention of Core Fracture During Extrusion of Bimetal Rods pp. 293–304
B. Avitzur, R. Wu, S. Talbert, and Y. T. Chou
An Investigation of the Shell Nosing Process by the Finite-Element Method. Part 1: Nosing at Room Temperature (Cold Nosing) pp. 305–311
Ming-Ching Tang and S. Kobayashi
An Investigation of the Shell Nosing Process by the Finite-Element Method. Part 2: Nosing at Elevated Temperatures (Hot Nosing) pp. 312–318
Ming-Ching Tang and S. Kobayashi
A Study of the Metal Flow Ahead of Tool Face With Large Negative Rake Angle pp. 319–326
Y. Kita, M. Ido, and N. Kawasaki

November 1982, Vol. 104, No. 4
Technical Papers

Orthonormal Processing of Metals. Part 1: Concept and Theory — pp. 327–331
N. P. Suh
Orthonormal Processing of Metals. Part 2: Mixalloying Process — pp. 332–338
N. P. Suh
Chip Formation With Chamfered Tools — pp. 339–342
M. Hirao, J. Tlusty, R. Sowerby, and G. Chandra
A Three-Dimensional Model of Surface Asperities Developed Using Moment Theory — pp. 343–348
W. R. DeVries
A Model for Surface Grinding Based on Abrasive Geometry and Elasticity — pp. 349–357
S. M. Pandit and G. Sathyanarayanan
Application of Plasticity Boundary Layer Theory to Metal Machining — pp. 358–362
P. S. Jackson and P. K. Wright
Product-Mix and Machine-Loading Analysis of Multistage Production Systems for Group Technology — pp. 363–368
K. Hitomi and I. Ham
Catastrophe Theory Models of Chip Formation — pp. 369–374
B. E. Klamecki
Development of Anti-Weldability Test in Metal Forming by Means of Strip-Ironing Type Friction Testing Machine — pp. 375–382
N. Kawai, T. Nakamura, and K. Dohda
Measures of Functional Coupling in Design — pp. 383–387
J. R. Rinderle and N. P. Suh
An Adaptive Pressbrake Control Using an Elastic-Plastic Material Model — pp. 389–393
K. A. Stelson and D. C. Gossard
Analysis and Characterization of a Pulp Refining System — pp. 394–399
M. R. Martinez and S. M. Wu
Reference-Word Circular Interpolators for CNC Systems — pp. 400–405
O. Masory and Y. Koren

February 1983, Vol. 105, No. 1
Technical Papers

Response of Fiber Properties to Gin Machinery and Moisture During Ginning as Measured by HVI — pp. 1–5
W. S. Anthony
Belt Aggregates in High-Speed Texturing — pp. 6–10
T. J. Kang and A. El-Shiekh
Nondestructive, Continuous Rapid Measurement and Control of Flock Density — pp. 11–15
V. A. Semenov, S. P. Hersh, G. N. Mock, and C. W. Malstrom
Interpretation of Loss in Strength and Breaking Elongation of Resin-Treated Cotton Fibers Using Microscopical Technique — pp. 16–20
A. Barghash and A. Seyam
Robotic Fabric Handling for Automating Garment Manufacturing — pp. 21–26
J. K. Parker, R. Dubey, F. W. Paul, and R. J. Becker
Automatic Moisture Sensor for Measurement and Control of Cotton Ginning Process — pp. 27–30
A. H. Waldie, S. E. Hughs, and M. N. Gillum
Adaptive Control in Machining—A New Approach Based on the Plastic Constraints of Tool Wear Mechanisms — pp. 31–38
D. W. Yen and P. K. Wright
An Upper Bound Approach on Deformation of Two-Phase Materials in Uniaxial Tension — pp. 39–44
Y. Tada, M. Oyane, S. Shima, T. Sato, and M. Omura
Real Time Identification of Workpiece Material Characteristics from Measurements During Brakeforming — pp. 45–53
K. A. Stelson
Computer Simulation of Breathing Systems for Divers — pp. 54–60
P. G. Sexton and M. L. Nuckols

May 1983, Vol. 105, No. 2
Technical Papers

Effect of Kinematic Oscillation on Tractive Characteristics of Steel Wheel on Rail — pp. 61–63
S. Kumar, Jong S. Kim, D. L. Parsana Rao, and Lixin Qian
Experimental Investigation of Contact Stresses Between a U.S. Locomotive Wheel and Rail — pp. 64–70
S. Kumar, Y. S. Adenwala, and B. R. Rajkumar
Dynamic Performance of Single-Axle Freight Trucks — pp. 71–74
D. N. Wormley and P. A. Tombers
Fuel Consumption of Freight Trains Hauled by Diesel Electric Locomotives — pp. 75–87
R. W. Radford
A Multifunction Thermomechanical Analyzer for Fibers—Its Constructional Features and Applications — pp. 88–93
Qian Baojun, Tian Hongjiang, Yang Pingyu, and Wu Zongquan
Performance Characteristics of Absorption Cooling Cycle Operated by Low Thermal Potential Energy Sources — pp. 94–99
I. Yaron, I. Borde, and M. Jelinek
Chatter Vibration of Lathe Tools. Part 1: General Characteristics of Chatter Vibration — pp. 100–106
E. Marui, S. Ema, and S. Kato
Chatter Vibration of Lathe Tools. Part 2: On the Mechanisms of Exciting Energy Supply — pp. 107–113
E. Marui, S. Ema, and S. Kato
Mechanics of Wobble Broaching. Part 1 — pp. 114–122
R. L. Murty, P. F. Reddy, and A. S. Prasad
Mechanics of Wobble Broaching. Part 2 — pp. 123–128
R. L. Murty, P. F. Reddy, and A. S. Prasad
Discussion on a Previously Published Paper by P. K. Wright — pp. 129–130
A. Bagchi

August 1983, Vol. 105, No. 3
Technical Papers

Instability Parameter for Machined Parts — pp. 133–136
A. Israeli and J. Benedek
A Mathematical Model for Split Point Drill Flanks — pp. 137–142
T. Radhakrishnan, S. M. Wu, and C. Lin
Brittle Fracture Initiation Under Complex Stress States — pp. 143–148
J. Takagi and M. C. Shaw
Further Developments in Applying the Finite Element Method to the Calculations of Temperature Distributions in Machining and Comparisons with Experiment — pp. 149–154
M. G. Stevenson, P. K. Wright, and J. G. Chow
Two-Dimensional Stock Cutting Problems and Solution Methodologies — pp. 155–160
S. C. Sarin
A Method for In-Process Failure Prediction in Cold Upset Forging — pp. 161–167
O. Ettouney and D. E. Hardt
Analysis of the Rolling Process Assuming Materials Described by Hyperbolic Sine Law — pp. 168–172
Y. S. Lee and L. C. Smith
Mathematical Model for Multifacet Drills — pp. 172–182
S. M. Wu and J. M. Shen
Cylindrical Flank Twist Drill Points — pp. 183–186
M. A. Fugelso
Relative Assessment of the Dynamic Behavior and Cutting Performance of a Bonded and a Cast-Iron Horizontal Milling Machine — pp. 187–196
H. C. Chang, M. M. Sadek, and S. A. Tobias
Plane Strain Visioplasticity for Dynamic and Quasi-Static Deformation Process — pp. 197–202
S. N. Dwivedi
Analysis on Simultaneous Double-Sided Grinding Stock Removal Distribution on a Thin Disk — pp. 203–209

M. Kobayashi, Y. Kurosaki, and N. Kawai

Model-based Control for Three-Roll Bending Process of Channel Bar pp. 346–351
Ming Yang, Susumu Shima, and Tohru Watanabe

An Efficient 2-D Finite Element Procedure for Isothermal Phase Changes pp. 352–360
S. Chandrasekar, S. Wang, and H. T. Y. Yang

Optimum Choice of Robot Actuators pp. 361–367
P. Chedmail and M. Gautier

A Discrete Data Base Multiple Objective Optimization of Milling Operation Through Geometric Programming pp. 368–374
N. K. Jha

Technical Briefs

Producing Three-Dimensional Shapes by Laser Milling pp. 375–379
R. K. C. Hsu and S. M. Copley

Verification of Strip Drawing Analysis Using New Sapphire Dies pp. 379–382
R. S. Rao

Root Sum Squares Tolerance Analysis With Nonlinear Problems pp. 382–384
W. H. Greenwood and K. W. Chase

Improvement of Response Spectrum Specifications in Dynamic Testing pp. 384–387
C. W. de Silva, M. Singh, and J. Zaldonis
